Sustainability at AstraZeneca

We have built our sustainability strategy around three pillars that put health at the heart of our work – beginning with Access to healthcare.

We are committed to the health of our patients, employees, environment and the communities we reach through our medicines, our investments and our partnerships. All of this is underpinned by a healthy business culture, centred on integrity, respect and transparency.

Our ambitions for 2025

**Access to healthcare**
- Health is at the heart of our business
- Address the global burden of NCDs through a holistic approach – from prevention to pipeline to treatment
- We promote disease prevention in our communities and support our patients, regardless of barriers they may face

**Environmental protection**
- The health of the planet impacts all life
- Manage our environmental impact across all our activities and our products
- We manage our environmental impacts, which helps to prevent the onset of certain diseases and improve health outcomes
- Product environmental stewardship, Greenhouse gas reduction, Pharmaceuticals in the environment, Water stewardship and Waste management

**Ethics and transparency**
- Healthy societies promote equality and prosperity for all
- Creative positive societal impact and promote ethical behaviour in all markets across our value chain
- We create environments across our worldwide operations, including our supply chain, that promote health and wellbeing
- Ethical business culture, Inclusion and diversity, Talent and workforce evolution, Workforce wellbeing and safety, Responsible supply chain and Human rights

**Our material issues**
- Disease prevention and treatment, Responsible R&D, Investments in health systems, Environment’s impact on health and Affordability
- Product environmental stewardship, Greenhouse gas reduction, Pharmaceuticals in the environment, Water stewardship and Waste management

**Our United Nations SDG impact**
